ZD1010J ENCLOSURE FOR DIN RAIL WITH MASKING FRAMES FOR DIFFERENT USES

Plug (6), Terminal Cover (5) and filters are optional, other elements are included in the basic set.

1 FULL MASKING FRAME

Recommended for enclosures without outlets where masking the entire opening is required. This type of masking frame can also be used for rare openings, like special sockets or connectors. Such masking frame can be milled for required openings.

2 GENERAL - PURPOSE MASKING FRAME

For enclosures with connectors utilizing all the wires. The entire width of the connector must be used to connect the cables.

3 MASKING FRAME FOR SOCKETS

Recommended for necessary use of convenient outputs from the board, e.g. USB, RJ, or other sockets.

4 MASKING FRAME FOR PLUGS

Midway solution between mask 1 and 2, where wires are used only partially, i.e. with shorter terminal strips.

Available enclosure filters: red, light grey, and transparent.
